Objective

To apply advanced machine learning techniques to solve complex problems and drive innovation in AI applications.

Skills

- Proficient in Python (scikit-learn, TensorFlow, PyTorch)
- Knowledge of deep learning models (CNNs, RNNs)
- Familiar with data preprocessing and feature engineering
- Experience with big data tools (Hadoop, Spark)

Experience

Machine Learning Engineer
AI Innovators Inc. | Boston, MA | Jan 2022 – Present

- Developed deep learning models to enhance image recognition accuracy by 20%.
- Deployed machine learning pipelines, reducing training time by 30%.
- Optimized NLP models for sentiment analysis, achieving 95% accuracy.

Research Assistant
AI Lab, MIT | Cambridge, MA | Aug 2020 – Dec 2021

- Conducted research on adversarial attacks in neural networks.
- Published findings in peer-reviewed journals.

Education

M.S. in Computer Science
Massachusetts Institute of Technology | Cambridge, MA | Dec 2021
